Subject: RE: Tilcon Connecticut, Inc. - EPA Request for Information - NESHAPS and NSPS

Hello Tom – Thank you for your response. This helps narrow the list of applicable facilities, assuming you are in agreement that plants without crushers (per 60.670 (a)(2)) are not subject to 40 CFR Part 60, Subpart OOO. If so, we are looking at approximately 7-10 locations. These are relatively complex facilities with many individual pieces of equipment. We have already begun the process of gathering information at these locations, but significant more effort is required to catalogue and provide the specifications requested in question 6 a-d, to the extent they are available. I am very reluctant to put an outside date on making a supplemental submittal because of this complexity, but we are anticipating it can be accomplished in 30-45 days. I am hoping you can see from our earlier submittal that we are treating the request seriously and are being responsive. As such, can you accommodate a 30-45 day estimate with a status update to be provided at 25 days? We can decide then whether we can submit the balance of the information within this time frame or whether additional time will be needed.

Please let me know on my OOO exemption question and thoughts regarding the submittal.

Many thanks,

-C

Chris: EPA Region 1 agrees to the proposal to narrow Question 6 to sites and equipment subject to 40 CFR Part 60, Subpart OOO.

Please advise as to your anticipated response date.

Thank you,

Tom

Hello Tom – Hopefully you received the attached regarding Tilcon CT. We did not hear back from you regarding our last correspondence yet, but wanted to demonstrate Tilcon’s good faith effort in meeting the due date we established. As such, the attached document addresses all questions with the exception of 6 and 7. Please confirm receipt and let us know your thoughts on these remaining two questions. Upon receipt, we will estimate the level of effort required to respond for the 34 facilities and then work with you to establish a reasonable submittal date.

I look forward to hearing from you.

Regards,

-C

Subject: RE: Tilcon Connecticut, Inc./Clean Air Act Reporting Requirement - January 3, 2018
Importance: High

Hello Tom – We have made a lot of progress gathering the information to respond to the reporting requirement for Tilcon as referenced above. Nevertheless, we are expecting that a further extension will be necessary. This is, in part, based on the fact that there are thirty four (34) separate properties involved (originally thought to be 25) and due to the complexity of many of the sites. Further hampering our efforts is the difficulty in locating records for facilities acquired over the years from other operators. We feel fairly comfortable that we will be able to respond comprehensively by our currently agreed upon date for all questions/items except 6 and 7 as further described below.

Item 6 appears to be extremely broad, requiring significant details for “all process and support equipment, including: mineral processing equipment, such as rock crushers; screening devices; and conveyors; as well fuel pumps; storage tanks; etc....”. This item seems to be irrespective as to whether or not the site(s) is subject to NSPS Subpart OOO and could also be interpreted to cover any and all equipment at a facility (loaders, haul trucks, pumps, boilers, engines, etc.). The actual amount of time to gather and assemble this much information for the thirty four (34) properties is not known. If item 6 was rephrased to only apply to those properties subject to Subpart OOO, the list of sites would be significantly less. As an example, based on our understanding that 60.670 (a)(2) provides an exemption for sites without crushers (confirmed by EPA staff), the list of sites subject to the reporting requirement would be significantly less. Without such specificity, we would be required to provide information about every conveyor, screen, tank, fuel pump, etc. for all of the properties despite not being subject to Subpart OOO. Can you please clarify if this is the intention of the EPA or whether we can filter out those sites and equipment not subject to Subpart OOO based on one of the standard exemptions.

Once we receive your response, we can better estimate the time involved in gathering the information in order to respond to items 6 and 7. In the meantime, we can respond to items 1-5 by April 9, but could use an extra week to chase down elusive information on a few of the sites. I would appreciate your response on both issues.

Thank you,

-C

Subject: Tilcon Connecticut, Inc./Clean Air Act Reporting Requirement - January 3, 2018

Hello Tom – We represent Tilcon on the above referenced matter. The reporting requirement requires submittal of significant documentation pertaining to compliance with NESHAP, NSPS, and federally enforceable Connecticut State Implementation Plan. We are in the process of gathering and assembling the required information, but request that an extension be provided for submittal. The subject requirement covers twenty-five (25) separate properties with complex operations involving quarrying, aggregate processing, and asphalt and concrete production.

Given the number of properties, complexity of the operations, and breadth of information being requested, we request that the submittal date be extended out an additional 45 days, which corresponds to April 9, 2018.

Please let me know if this is acceptable. If you would like to discuss this matter further, I can be reached at 203.458.7200.

Thank you in advance.
